

BACK-UP SUMP PUMP PROTECTION

NO ELECTRICITY, NO BATTERY

NO MAINTENANCE REQUIRED

APPLICATIONS :

The Sump Buddy is easily connected to the municipal water supply line and to your existing conventional sump pump discharge line. In the event of a power outage or electric pump failure, the rising water in the sump will activate an automatic control valve which will start the system.

Water under pressure will flow through the Sump Buddy which creates a vacuum and causes the water in the sump to be drawn out into the discharge line.

THE SUMP BUDDY

**40 PSI
OF MUNICIPAL
WATER
PRESSURE
REQUIRED**

300402

**Powered
by your
municipal
water supply**

A must for every home owner with municipal water supply and a need for all conventional type sump pumps. For a maximum lift of 15' (4,5m).

HEAD	LPH	HEAD	USGPH
